WelchAllyn®

Welch Allyn ProBP 2000—the IDEAL BLOOD PRESSURE SOLUTION for your care setting

We've combined two of our innovative technologies to enhance exams for you and your patients.

Welch Allyn SureBP® technology

Our SureBP inflation-based algorithm is used across Welch Allyn vital signs devices, helping clinicians in every care setting capture automated, fast and accurate blood pressure readings.

- Y Blood pressure readings are captured more comfortably on inflation and take about 20 seconds
- Y Meets AAMI standards for blood pressure accuracy
- Y One-button touch triggers the device to start capturing on cuff inflation
- Y 97% completion rate in the presence of motion¹

“SureBP technology offers great advantages in speed and patient comfort... clinicians can have added confidence in this new technology.”

Dr. Bruce S. Alpert | University of Tennessee, AAMI Sphygmomanometer Committee Chair

Welch Allyn FlexiPort® Blood Pressure Cuff technology

Using the correct cuff size is an important factor in obtaining accurate readings. Welch Allyn FlexiPort cuffs come in a wide variety of sizes to help address a larger range of your patient population, helping you ensure the right cuff size is used each time, to support accuracy.

- Y Unique “snap-fit”, single-point connection helps remove the hassle of traditional cuff tubes and connectors, to better support a busy workflow
- Y The ProBP 2000 is compatible with FlexiPort Reusable cuffs, ranging from child up to large adult and thigh (15-55 cm range)
- Y When combined with SureBP technology, helps capture readings on inflation in about 20 seconds¹

When looking for a clinical digital blood pressure device, **accuracy** and **reliability** may be your biggest concerns. Welch Allyn has designed the new ProBP 2000 digital blood pressure device with technology features for results you can feel confident in.
